Date : June 17, 2005  
Telephone: (916) 654-4996

To : Joseph Desmond, Chairman  
Jackalyne Pfannenstiel, Vice Chair  
Arthur H. Rosenfeld, Ph.D., Commissioner  
James D. Boyd, Commissioner  
John L. Geesman, J.D., Commissioner

From : California Energy Commission - Scott Matthews  
1516 Ninth Street Acting Executive Director  
Sacramento, CA 95814-5512

Subject : **2nd DATA ADEQUACY RECOMMENDATION FOR THE PASTORIA ENERGY FACILITY EXPANSION PROJECT (05-AFC-1)**

The staff has completed its data adequacy review of the Pastoria Energy Facility Expansion Project Application for Certification (AFC) Supplement submitted on June 13, 2005. Staff has determined that the AFC contains all the information required by Cal. Code of Regs., tit. 20, § 1704, Appendix B for the 12-month AFC process.

The applicant has also requested an expedited 6-month siting process allowed under Public Resources Code §25550. However, after review of the AFC and Supplement, staff has determined that it does not meet the data adequacy requirements of the 6-month process for transmission systems engineering because the 6-month AFC requires that the mitigation measures for all transmission system impacts be provided in the application. These are missing and not expected for at least 90 days. Therefore, staff recommends that the Energy Commission find the AFC inadequate for the 6-month process.

Attachment A contains an overview of whether each technical discipline evaluated is adequate or inadequate. Attachment B contains staff's detailed data adequacy worksheets that describe staff's findings for each information requirement that was previously deemed inadequate for either the 6-month and 12-month processes.

We have received comments from the San Joaquin Air Pollution Control District and the US Environmental Protection Agency which have both indicated that the application is complete for their purposes.

At the Energy Commission's business meeting on June 22, 2005, I will recommend that the Energy Commission accept the AFC for the 12-month process. Pursuant to Cal. Code of Regs., tit. 20, § 2023 (c), if the Energy Commission accepts my recommendation, the Energy Commission shall indicate, in writing, those parts of the AFC which fail to meet the information requirements and the manner in which it can be made complete.

If you have any questions, please call James W. Reede, Jr., Ed. D., staff's Project Manager, at (916) 653-1245.

Docket: 05-AFC-1

Technical Senior: Natasha Nelson

SITING REGULATIONS	INFORMATION	AFC PAGE NUMBER AND SECTION NUMBER	ADEQUATE YES OR NO	INFORMATION REQUIRED TO MAKE AFC CONFORM WITH REGULATIONS
Appendix B (g) (1)	...provide a discussion of the existing site conditions, the expected direct, indirect and cumulative impacts due to the construction, operation and maintenance of the project, the measures proposed to mitigate adverse environmental impacts of the project, the effectiveness of the proposed measures, and any monitoring plans proposed to verify the effectiveness of the mitigation.	Applicant has not prepared their own discussion of impacts but instead simply states that there will be no impacts (Volume I, Section 5.5.2, page 5.5-2). However, the AFC does include some relevant discussion to the proposed project in the CEC description of the existing project, which is provided in Volume I, Section 9, CEC Presiding Members Decision, Section VII Environmental Assessment, Soil and Water Resources, page 191.	<del>No</del> <u>Yes</u>	<del>See specific information needs below.</del>
Appendix B (g) (14) (A)	All information required by the Regional Water Quality Control Board in the region where the project will be located to apply for:		----	
Appendix B (g) (14) (A) (i)	Waste Discharge Requirements; and	Not Applicable	N/A	
Appendix B (g) (14) (A) (ii)	a National Pollutant Discharge Elimination System Permit.	Not Applicable	N/A	
Appendix B (g) (14) (B)	A description of the hydrologic setting of the project. The information shall describe, in writing and on maps at a scale of 1:24,000, the chemical and physical characteristics of the following water bodies that may be affected by the proposed project:	Partial description of hydrologic setting is found in Volume II, Attachment D, Section 5.5.1.1.2, page 5.5-2 to 5.5-3	----	
Appendix B (g) (14) (B) (i)	Ground water bodies and related geologic structures;	Volume II, Attachment D, Section 5.5.1.1.2, page 5.5-3 Volume II, Attachment B, Section 5.3.1.1.3, pages 5.3-3 to 5.3-17 <u>6/13/05 Supplement</u>	<del>No</del> <u>Yes</u>	<del>Description of chemical characteristics of groundwater.</del>

SITING REGULATIONS	INFORMATION	AFC PAGE NUMBER AND SECTION NUMBER	ADEQUATE YES OR NO	INFORMATION REQUIRED TO MAKE AFC CONFORM WITH REGULATIONS
§2022(b)(3)(A) (TSE)	An interconnection study identifying the electrical system impacts and a discussion of the mitigation measures considered and those proposed to maintain conformance with NERC, WSCC, Cal-ISO or other applicable reliability or planning criteria based on load flow, post transient, transient, and fault current studies performed by or for the transmission owner in accordance with all applicable Cal-ISO or other interconnection authority's tariffs, operating agreements, and scheduling protocols and	6/13/05 Supplement	No	The Transmission System Impact Study (SIS) must have been reviewed at least once by the CA ISO. The SIS was submitted to the CEC and CAISO on <del>May 16</del> , <u>June 13</u> , 2005, however, until comments are received from the CAISO on the completeness of the SIS the AFC staff cannot make a recommendation for data adequacy for the 6-Month process.
§2022(b)(2)(B) (TSE/FD)	A full description of the facilities, if any, that are required for interconnection, including all such facilities beyond the point where the outlet line joins with the interconnected system and a full description of the environmental setting, environmental impacts, and any recommended mitigation measures proposed by the applicant for any required facilities beyond the point where the outlet joint with the interconnected system;	6/13/05 Supplement	No	The SIS indicates the need for downstream facilities and a CAISO waiver for potential overloads. Note: Without the interconnection study and identification of mitigation measures it is not known whether or not facilities beyond the point where the outlet line joins with the interconnected system will be required. This is a complex case due to the potential for severe overloads, additional studies needed and potential downstream upgrades or new transmission facilities. Reconductoring of an existing line or construction of a new line is a reasonably foreseeable facility and requires environmental info per our 6-month Regs.
§2022(b)(4) (Any area that addresses disproportionate impacts; environmental justice)	A discussion of the potential for disproportionate impacts from the project on minority or low-income people; such discussion shall include, but not be limited to, all of the following:
